The amendment filed 20 December 2004 has been entered.

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1, 3-7, 10-17, 21-24 and 34 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-26 of U.S. Patent No. 6,617,321 B2 in view of Martin et al. US 5,292,760. Although the conflicting claims are not identical because they are of different scope than the patent the difference does not constitute a patentable distinction. Claim 1 of the patent is limited to olanzapine pamoate salt or solvate thereof and claim 1 of the application is directed to olanzapine pamoate monohydrate. It is known to use monohydrates of benzodiazepines for stability. See Martin et al column 12,

lines 25-29, examples 11, 16, 17, 35. The release profiles would be the same because the carrier components are the same. It would be obvious to modify the olanzapine to provide olanzapine pamoate monohydrate. One would be motivated to do so to enable optimum therapeutic response because a stabilized dosage form would have better bioavailability.

Claims 1, 3-7, 10-17, 21-24 and 34 are rejected.

Claims 2, 8, 9, 18-20 and 25-33 have been canceled.
